

Join your peers and colleagues for a MOREnetworking Together meeting near you!

The February 2008 MOREnetworking Together regional meetings will highlight the latest MOREnet program and service updates, including a legislative update, and give you the chance to network with each other and offer us some much-needed feedback on the job we're doing for you. Polycom will provide a special presentation during lunch on rich media collaborative applications for voice, video, data and the Web. We encourage Institutional Representatives, Technical Contacts, Administrators and other interested staff from all member institutions to attend. If you don't see a meeting in your area in February - keep watching www.more.net for upcoming event dates in your area!
