

District Vetting Before Requesting an Agreement —

- 1 Confirm a DPA doesn't already exist in the Auto Exhibit E Creator.** Download the Exhibit Es into a spreadsheet for easier searching.
- 2 Do not request Social Media resources that clearly do not comply with the DPA.** (Facebook, Youtube, etc.)
- 3 If the vendor's website displays photos of students accompanied by student names, and/or lists of student participants with their associated school districts, the vendor is publicly displaying student information.** In these situations, the vendor cannot sign a DPA and districts will need to obtain written parent consent.
- 4 Confirm the tool collects student PII.** If they do not collect PII, it will be in the vendor's privacy policy. Review to confirm.
- 5 Confirm the TOS/Privacy Policy does not prohibit the intended age group from using the tool.**
- 6 If the vendor has declined with multiple SDPC Alliances, do not submit a request.** Research in the National Database for this information.

If you are a TEC member:

- 1 Please login to MyMOREnet, select the Student Data Privacy section and review the list of resources and processes under TEC Agreement Exceptions.**
- 2 Once you request from TEC, TEC will review:**
 - a. Location of countries data is stored.** Will notify the district if data is stored in countries of concern. If the district wants to pursue, the agreement will be a district-only agreement.
 - b. Vendor policy on delivering targeted advertising.**
